Powering Enterprise Modernisation with Intelligent Orchestration

Build a connected foundation for enterprise modernisation with NewgenONE.

Legacy environments often carry years of accumulated complexity, fragmented information and rigid business processes. Simply migrating existing systems can preserve these limitations, making it harder to improve operational efficiency, adapt to changing requirements and adopt emerging technologies.

NewgenONE brings together enterprise content, applications, processes and customer communications to help organisations modernise existing capabilities and evolve their technology landscape. With flexible deployment options and integrated AI capabilities, including Agentic AI, enterprises can build more adaptable operations while extending existing technology investments.

THE CHALLENGES

Ageing Technology

Rising maintenance costs and limited scalability

Disconnected Systems

Fragmented information and complex integrations

Modernisation Complexity

Migration risks, embedded business rules and operational dependencies

Limited Agility

Rigid architectures that constrain change and innovation

ONE PLATFORM FOR EVERY MODERNISATION JOURNEY

Modernise enterprise applications, connect business capabilities and strengthen operational agility through a flexible approach aligned with evolving business needs and technology priorities

MODERNISING CONTENT, PROCESSES AND COMMUNICATIONS

Enterprise Content Management

Modernise Content Strengthen Control

Centralise, secure and manage business content and documents across the enterprise to improve information access, governance and operational efficiency.

Business Process Management

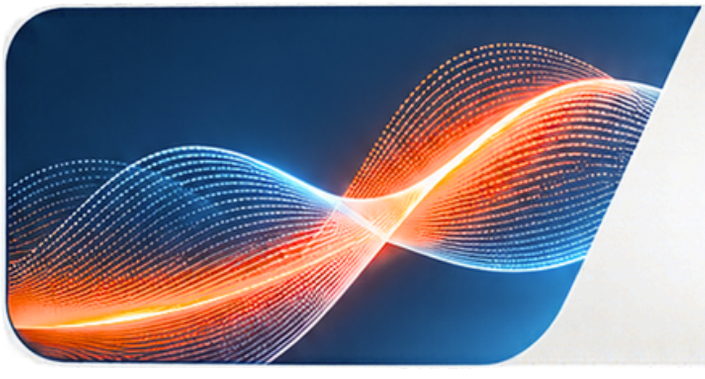

Modernise Applications Orchestrate Workflows

Transform legacy applications and rigid workflows through process orchestration and automation to enable more adaptable business operations.

Customer Communication Management

Modernise Communications Improve Experiences

Modernise communications systems through centralised communication design, content generation, delivery and governance across channels.

INTELLIGENCE ACROSS ENTERPRISE OPERATIONS

Integrate Agentic AI into enterprise workflows to coordinate tasks, process information and support complex, multi-step operations. Connect enterprise capabilities to enable more intelligent execution across business processes.

BUILT FOR COMPLEX ENTERPRISE ENVIRONMENTS

Legacy Transformation	Modernise applications while extending existing investments
Cloud and Architecture	Support public, private, hybrid and multi-cloud environments, subject to deployment requirements
Enterprise Connectivity	Integrate existing systems to support connected operations
Governance and Security	Support enterprise governance, security and compliance requirements
Flexible Operating Models	Enable management by internal teams, Newgen or a services partner, depending on the engagement model

About Newgen

Newgen Software Orchestrates Intelligent Enterprises at scale. The NewgenONE Platform unifies content, processes, and communications into an orchestration layer where intelligence is embedded into how enterprises operate, with trust, governance, and control built in. Enterprises move beyond fragmented initiatives to continuously adaptive, production-ready operations. Decisions, workflows, and experiences evolve in real time, shaped by context, data, and embedded AI. Trusted by leading organizations worldwide, Newgen defines how modern enterprises operate, intelligently and at scale.
