

Digitally Transforming Oil and Gas Organizations with Newgen

Overview

Enterprises in the energy and utilities industry have embraced digital, and yet many continue to rely on disconnected and transactional systems. The time is now for business leaders, like you, to adopt an integrated approach and digitally transform end-to-end processes while building a robust and scalable business ecosystem.

Operational Challenges

- Lack of effective monitoring of data and approvals, coming in from various sources
- Misplacing and misfiling of required information due to siloed processes
- Poor visibility and control over processes, leading to delay in turnaround times
- Ineffective data integration and information exchange because of the absence of an application programming interface (API)

By leveraging the NewgenONE Digital Transformation Platform—a comprehensive and unified cloud-based platform, you can streamline end-to-end processes across streams, including upstream, midstream, and downstream

What Makes the Platform Unique?

- A unified, cloud-based platform
- Intelligent and compliant processes
- Content-driven holistic automation
- Personalized communications across channels
- Low code for business speed and agility
- Robust integration ecosystem
- Secure access to processes
- Strict data governance
- Deep analytical insights
- High scalability and extensibility

Core Highlights

- Facilitate end-to-end records and content management with **anytime-anywhere** access to information
- Optimize key processes and create a **unified interface** for better control
- Create applications that **digitally transform processes** while connecting people, systems, and things and provide a unified interface for both internal and external customers
- **Integrate with ERP and other third-party systems** and applications using standard connectors and web APIs
- Build a **paperless office** and streamline end-to-end processes across streams, including upstream, midstream, and downstream
- Develop **complex, content-driven, and customer-engaging business applications**, catering to enterprise-wide use cases, including engineering drawings, transmittal management, maintenance workflows, incident reporting, commissioning and decommissioning, contracts management, real estate acquisition and lease management, and many more

Business Benefits

- Reduced manual intervention
- Faster access to documents
- Better compliance
- Smarter decision-making
- Smooth collaboration among users and departments
- Efficient tracking and monitoring
