Newgen OmniDocs Contextual Content Services Platform on Microsoft Azure

By 2025, over 95% of new digital workloads will be deployed on cloud-native platforms. Enterprises are increasingly adopting the cloud model to future-proof their organizations and stay current and competitive.

Need for a Cloud-based Model

- Difficulty in procuring IT infrastructure like servers, database, storage, etc.
- Planning and executing disaster recovery
- Service downtime due to maintenance and updates
- Various security concerns
- Scaling according to market demands
- Lack of remote and secure information access

Newgen OmniDocs Content Services Platform on Microsoft Azure

Newgen OmniDocs Contextual Content Services Platform is a leading, industry-recognized platform that enables end-to-end management of enterprise content. The platform is powered by the quality, security, and reliability of Microsoft Azure.

OmniDocs on Microsoft Azure leverages a cloud-based infrastructure to meet evolving business needs, integrate seamlessly with your existing IT systems, and provide best-in-class solutions.

With Microsoft Azure, the platform enables a modern and boundaryless workplace with anytime-anywhere content access and document management. Furthermore, it ensures security of business-critical information and compliance with regulatory standards while driving enterprise-wide digital transformation.

Newgen's Contextual Content Services Platform is Recognized by Leading Analysts

*"**Visionary**" in Gartner Magic Quadrant for Content Services Platform, 2021*

*"**Strong Performer**" in Forrester Wave: Content Platforms, Q2 2021*

Core Capabilities

Cloud-based model for enhanced auto-scaling and portability

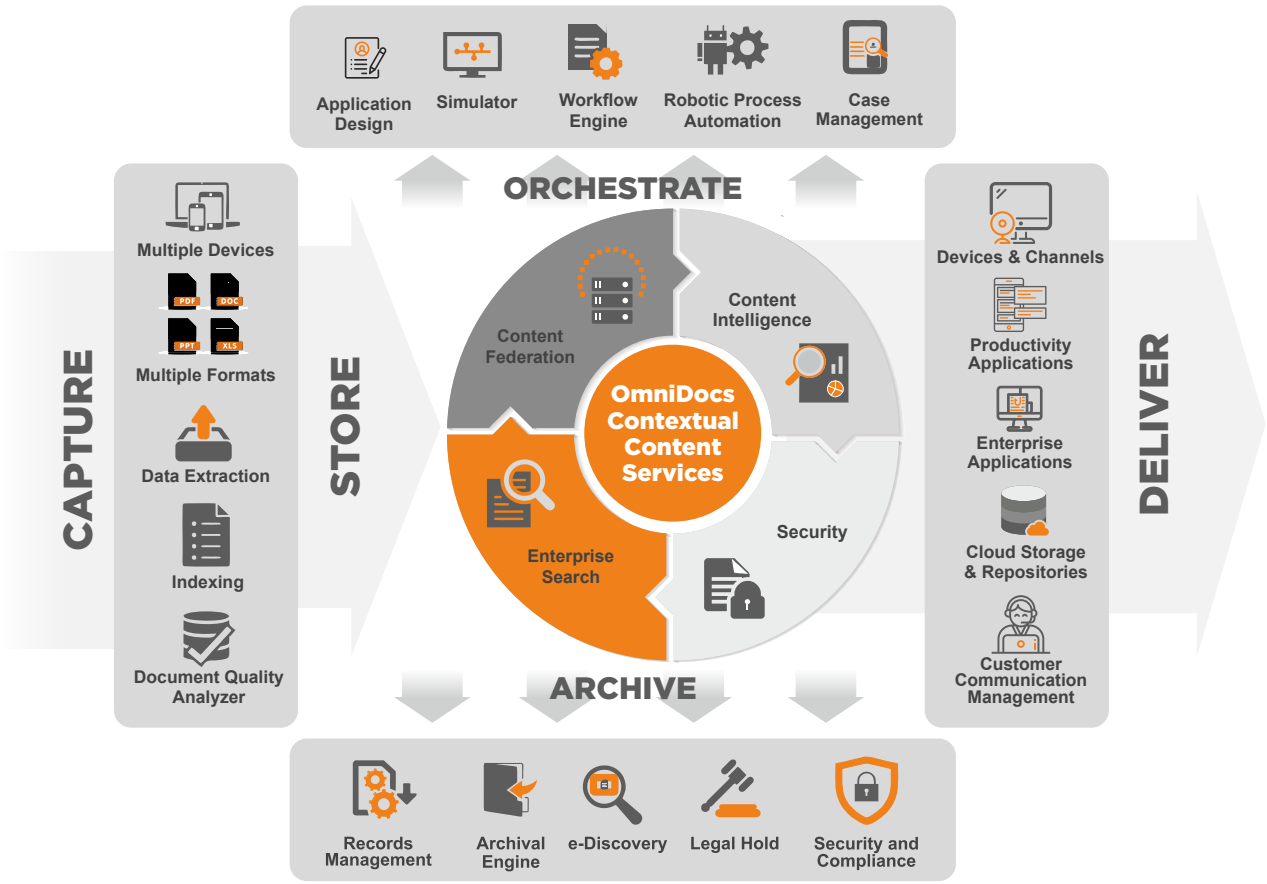
Policy-based content movement between storage types

Secure archival of enterprise content either on the cloud irrespective of content type, volume, and size, including audio/video

Comprehensive set of microservices for different content operations

Optimized content storage based on the frequency of access

Newgen Contextual Content Services



Key Benefits

Enable Seamless Transition to a Cloud-based Environment

With OmniDocs on Microsoft Azure, you can remotely operate in a cloud-based, dynamic environment without hampering your services' reliability, speed, and performance.

Ensure Scalability and Faster Response

The cloud-based infrastructure allows you to scale elastically. You can easily scale up or scale down the IT resources like computing power, storage, and bandwidth per requirement.

Optimize Costs

Transitioning from legacy IT to a more efficient, cloud-based model eliminates the overheads involved in developing and maintaining servers. Furthermore, cloud-based services help reduce the total cost of ownership of software infrastructure by minimizing your hardware equipment costs and other IT expenditures.

Ensure Certainty with a Disaster Recovery Plan

Protect your operations from downtime and data loss. In the unlikely event of a production environment becoming unavailable or unusable, the disaster recovery environment allows you to ensure business continuity. It also retains production environment capabilities and mitigates the impact of a site disaster.

Get Instant Support

OmniDocs on Microsoft Azure ensures that the production environment is controlled per the best industry practices, ensuring seamless day-to-day operations. Furthermore, maintenance and other support activities are performed via an authenticated, privileged access management system, which manages end-to-end sessions, accesses the credentials of the production environment, and records all the performed activities.

Leverage Existing Microsoft Investments

Ensure optimum utilization of your Microsoft investment with Newgen on Microsoft Azure. It allows integration with various Microsoft technologies, including Microsoft Office 365, Microsoft Teams, Active Directory, and artificial intelligence services.

Unlock Best-in-class Services with OmniDocs on Microsoft Azure

About Newgen

Newgen is the leading provider of a unified digital transformation platform with native process automation, content services, and communication management capabilities. Globally, successful enterprises rely on Newgen's industry-recognized low code application platform to develop and deploy complex, content-driven, and customer-engaging business applications on the cloud. From onboarding to service requests, lending to underwriting, and for many more use cases across industries. Newgen unlocks simple with speed and agility.
