NEWGEN CSR's Quarterly Newsletter

10 YEARS & AHEAD!

April –June 2026

Newgen CSR entered the fiscal year with enthusiasm as it celebrates 10 years of its journey.

In April, we continued the CSR Week celebration with the round of exhibitions of handicrafts created by the women beneficiaries of the Skill Development Centre (SDC). With the 'Spring Special' theme, the CSR team filled the corners of various Newgen office locations around Delhi-NCR with the vibrant colours of crochet flowers, printed home décor items, handbags, toys, accessories and related items.

"I had joined the Skill Development Centre to learn something new, and I never imagined that the items I created would be appreciated and purchased by so many people." – Pinki, a SDC trainee

Taking a Step Towards Financial Independence

We proudly announce the registration of the 1st Self Help Group (SHG) – Nayi Disha of the SDC. This is a milestone for the women of the first batch who have been trained for almost 2 years and are now moving further to create a sustainable method of income generation. Newgen CSR continues to guide and handhold them by continuing the training of the craft and networking with stakeholders like NULM and bank officials and representation at artisan forums.

"I am excited to be a part of Nayi Disha, SHG as now we will be exploring more aspects of creating and marketing our products." – Sumanlata, a SDC trainee

Mental Health Well-Being

The mental health management sessions have been a critical part of our programs to support the primary beneficiaries, girl child and women towards holistic growth. Monthly group sessions as well as individual counselling sessions are being provided to help women understand themselves, calm the wired emotions and detangle the clouding thoughts.

"We never looked after ourselves earlier, but now I know that we need to take care of ourselves to do better in life."- Sama Begum, a SDC trainee

"I learned that everyone is unique and we should never compare ourselves with others." – Baby, class 7th student

Orientation of NDDP's Beginner Batch

Newgen CSR's partnership is made strategically and one such example is the collaboration with KHUSHII Ngo which implements remedial and digital education program to the MCD feeder schools in Delhi's Okhla region. The pass out students join CSR's flagship program – Newgen Digital Discovery Paathshala (NDDP) from Class 6th. To bridge the digital gap for the less privileged girl students and create a level playing field for them, tabs along with sims have been provided. This component of the program aims towards providing a tool for education and build a habit of self-learning. The sims are regularly recharged based on the performance of the students. A total of 145 students were provided with tab and sim in May 2026.

"I used the tab to research online and complete my holiday homework. I find the NDDP online sessions interactive and easy to understand." – Sonali, class 6th student

Moving Beyond Curriculum

Every year, the summer holidays is the time when NDDP engages with the students and take the discussions beyond their textbooks. For class 7th & 8th, STEM sessions have been introduced which included experimenting with Lego kits to make robots, understand the concept of AI and prepare telescope and microscope using DIY kits. For class 6th & 7th, digital skilling up sessions helped them understand the basic ways of using a tab and online medium. For class 7th to 12th pass, Communication in English Sessions were conducted.

At the culmination days of each session, we witnessed the impact with students being able to express confidently in English and have better understanding of science and technology related discussions.

A special mention to Newgen employees from different teams who turned up throughout the month as volunteers and guided the students whole heartedly.

"I really enjoyed joining the STEM Summer Camp. Earlier, I was afraid of science, but now that fear has reduced a lot. I would love to continue here in the future." - Anshu, class 8th student

Welcoming the Newgen's Young Leaders Cadre

New joiners from IIMs visited Newgen's Okhla phase 1 office in May to interact with the CSR team and have a hands-on experience of the programs. They attended the STEM summer camp and built Lego robot-models with the students. Then they visited the SDC, met the women trainees, witnessed the operational part of the programs. CSR team also exhibited a small display of handicraft products. The products were appreciated. The interaction connected the new joiners with the social impact aspect of the company.

Reflection Visit to KHUSHII's Project

In the month of May, CSR team representatives visited one of the schools supported in Ramgarh, Uttarakhand. The visit included interactions with the students, parents and stakeholders like village leaders, school Principal and teaching staff. Hearing to the different stories and aspects we got a better understanding of the life at the hills and how the students are giving their best to learn and grow in life. Cheers to them!

"It was heartwarming to see the children excelling far beyond their peers despite living in challenging geographical terrains with limited resources. The digital intervention has transformed the school's learning environment, redefining what is possible for its students."
– Shweta Kaushal, CSR
