

CSR STEM WEEK, APRIL 2023

STUDENTS' ANECDOTES

Newgen CSR STEM Week 2023 was a worthwhile investment of time, energy and efforts. The first pilot workshop on 'Tinkering with Robotics' was a success. Around 120+ girl students from Harkesh Nagar and Tekhand Govt. Schools were exposed to the exciting world of STEM! With the help of 4 dedicated India Stem Foundation Trainers and 25+ Newgen Volunteers, the girls learned complex STEM concepts through hands-on activities over the course of 1 week.

Let's hear from our students –

"The session built the confidence in me to pursue Science and gave me a push to build my future in STEM. It proved that Science is gender-neutral." – **Jiya***, class IX

"I learnt concepts of Physics while tinkering with the robots. I was on cloud nine when I built a humanoid robot with multiple sensors and saw it walking in the NDDP Lab." – **Sonam**, class X

"I always feel intimidated by the idea of science but the workshop helped me in combating my fear. Who says it's difficult? I wish if we can have these classes every day. Also, I built a robot with ears." – **Shipra**, class X

"STEM is the future' is what I learnt during those 5 days. I made an obstacle avoidance robot using beans, axle, and brain. My friends & I are not anymore scared of Math & Science." – **Vidhi Patel**, class IX

"What if we have robots for border surveillance instead of soldiers? Don't you think this will save a lot of lives? STEM workshop was an eye opener for me." – **Nagma**, class IX

"I never knew that I could build a robot one day. I saw them in the Science videos only, the tinkering workshop made me realize my potential." – **Ayushi**, class X
