

# Building Brighter Futures

*A partnership between Newgen Software and KHUSHII*

***“The digital intervention is impacting around 350 girls, most of them are first gen school goers and are from less privileged communities”***

In collaboration with our implementation partner KHUSHII, Newgen continues to make a positive impact, especially in the education sector. Our outreach now extends to the newly adopted MCD Primary School in Indira Kalyan Vihar, Okhla, benefiting 1092 students through remedial and digital education initiatives.

Resource centers, managed by KHUSHII, offer enriching activities, such as spoken English, counseling, Water, Sanitation, and Hygiene (WASH), and computer sessions. These efforts aim at extending holistic support and empowering students digitally.

Around 350 girls from class III to V, many from underprivileged backgrounds, have greatly benefitted from digital interventions. Students have the opportunity to learn computer room etiquette and gain practical exposure to software, such as Notepad and MS Paint. Counseling sessions encourage bonding and sharing personal stories, while the English classes put newly acquired vocabulary into practice.

This partnership brings positive change, promising a brighter future for these young minds. We remain committed to expanding these initiatives and empowering more students and communities through the power of education and technology.

***“Together, we create a brighter future.”***
