

Personality Development Programme

Instilling a sense of confidence, developing soft skills, and channelizing energies of the students in the right direction.

Newgen has created a personality development programme for the children of less-privileged section of the community. The personality development sessions are conducted on 2nd Saturday of every month by I-AM. In 2018-19, 100+ students have been a part of the programme and have benefited from these sessions.

The objective of these sessions is to instill a sense of confidence in these children, develop soft skills, and channelize their energies in choosing the right career path for them.

To boost the outreach of the programme, Newgen is in the process of selecting students from the adopted schools and enrolling them in personality development sessions.
