Report of Independent Auditor's to the Shareholders of NEWGEN SOFTWARE TECHNOLOGIES LLC

OPINION

We have audited the accompanying financial statements of **NEWGEN SOFTWARE TECHNOLOGIES LLC** ("the Company"), which comprise the Statement of financial position as at March 31, 2026, and the Statement of profit and loss and other comprehensive income, Statement of changes in equity, Statement of cash flows for the year then ended, and a summary of material accounting policies and other explanatory information.

In our opinion, the accompanying financial statements, present fairly, in all material respects, the financial position of the Company as at March 31, 2026, and its financial performance and its cash flows for the year then ended, in accordance with International Financial Reporting Standards (IFRSs).

BASIS OF OPINION

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA code), and the ethical requirements that are relevant to our audit of the financial statements in the United Arab Emirates. We have fulfilled our other ethical responsibilities in accordance with IESBA code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and for such internal controls as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Charged with governance are responsible for overseeing the Company's financial reporting process.

OTHER MATTER

The financial statements for the previous year ending March 31, 2025 were audited by another auditor who expressed an unmodified opinion. Our opinion is not modified in this respect.

AUDITORS RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and to obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transaction events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

As required by the provisions of U.A.E Federal Decree Law No. (32) of 2021 for Commercial Companies and its latest amendments and laws and regulations of, we further confirm that,

i. We have obtained all the information and explanations which we consider necessary for the purpose of our audit;

ii. The financial statements of the Company have been prepared and comply, in all material aspects, with the applicable provisions of the U.A.E Federal Decree Law No. 32 of 2021;

iii. The Company has maintained proper books of accounts;

iv. The contents of the Director's report which relates to the financial statements are in agreement with the Company's books of accounts;

v. The Company has not purchased or invested in any shares during the year ended March 31, 2026;

vi. The financial statements of the Company reflects all the disclosures relating to material related party transactions and the terms under which they are conducted;

vii. Based on the information that has been made available to us nothing has come to our attention which causes us to believe that the Company has contravened during the financial year ended March 31, 2026 any of the applicable provisions of the U.A.E. Federal Decree Law No. (32) of 2021 or of its Articles of Association which would materially affect its activities or its financial position as at March 31, 2026.

NEWGEN SOFTWARE TECHNOLOGIES L.L.C
DUBAI, U.A.E.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2026

1 LEGAL STATUS AND ACTIVITY

a) NEWGEN SOFTWARE TECHNOLOGIES L.L.C was initially registered in Dubai on 15 June, 2022 as a Limited Liability Company - Single Owner under the U.A.E. Federal Commercial Company Law. The registered address of the Company is Office No. 82, Unique World Business Center Branch, AL Karama, Dubai, United Arab Emirates.

b) The Company holds the following trade licences: (i) Mainland Trade Licence No. 1071797 and (ii) Branch Office Trade Licence No. 104800.

c) The principal activity of the Company is Data Classification & Analysis Services, Education & Training Computer Software, Data Management & Cyber Security Services, IT Infrastructure, Information Technology Network Services, Computer Systems & Communication Equipment Software Design and Cloud Service & Datacenters Providers.

d) The Company is controlled and managed by Mr. Prashant Sahai Kamleshwar Sahai, an Indian national.

2 SHAREHOLDING

Name	Number of shares	Total (AED)
M/s Newgen Software Technologies Limited (Indian Company)	3,000	3,000,000

3 NEW STANDARDS AND AMENDMENTS

3.1 New and amended IFRS Accounting Standards that are effective for the current year

In the current year, the Company has applied a number of amendments to IFRS Accounting Standards issued by the International Accounting Standards Board (IASB) that are mandatorily effective for an accounting period that begins on or after 1 January 2025. Their adoption has not had any material impact on the disclosures or on the amounts reported in these financial statements.

4 MATERIAL ACCOUNTING POLICIES

a) Basis of preparation

These financial statements are prepared under the historical cost convention and in accordance with International Financial Reporting Standards issued or adopted by the International Accounting Standards Board (IASB) and the requirements of U.A.E. Federal Commercial Companies Law No. 32 of 2021, as amended.

b) Accounting convention

These financial statements have been prepared under the historical cost convention. The fair / net realizable value concept of measurement of assets and liabilities has also been applied wherever applicable.

c) Presentation currency

These financial statements have been expressed in AED, which is the functional domicile currency of the Company. The figures have been rounded off to the nearest 1/- AED.

d) Summary of Material accounting Policies

The material accounting policies adopted and which have been consistently applied are as follows:

i) Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services after excluding discounts, if any.

The Company recognises revenue from contracts with customers based on a five-step model as set out in IFRS 15:

Step 1: Identify the contract(s) with customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.

Step 2: Identify the performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer.

Step 3: Determine the transaction price: The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.

Step 4: Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Company will allocate the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Company expects to be entitled in exchange for satisfying each performance obligation

Step 5: Recognise revenue when (or as) the Company satisfies a performance obligation at a point in time or over a period.

Revenue is recognised when or as a performance obligation in the contract with customer is satisfied, i.e., when the "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation is a promise to transfer a distinct goods or service (or a series of distinct goods or services that are substantially the same and that have the same pattern of transfer) to the customer that is explicitly stated in the contract and implied in the Company's customary business practices.

Revenue is measured at the amount of consideration to which the Company expects to be entitled in exchange for transferring the promised goods or services to the customers, excluding amounts collected on behalf of third parties such as taxes. If the amount of consideration varies due to discounts, rebates, refunds, credits, incentives, penalties or other similar items, the Company estimates the amount of consideration to which it will be entitled based on the expected value or the most likely outcome. If the contract with customer contains more than one performance obligation, the amount of consideration is allocated to each performance obligation based on the relative stand-alone selling prices of the goods or services promised in the contract. The revenue is recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

ii) Foreign currency transactions

Transactions in foreign currencies are translated into UAE Dirham at the rate of exchange ruling on the date of the transactions. However, for reporting purposes, every figure is translated in UAE Dirham.

Monetary assets and liabilities expressed in foreign currencies are translated into UAE Dirham at the rate of exchange ruling at the statement of financial position date.
Gains or losses resulting from foreign currency transactions are taken to the statement of comprehensive income.

iii) Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a realizable estimate of the amount of the obligation can be made.
The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).
When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received, and the amount of the receivable can be measured reliably.

iv) Cash and cash equivalents

Cash and cash equivalents comprise cash and balance in bank current accounts.

v) Inventories

Inventories are stated at the lower of cost and net realizable value. Costs comprise direct materials plus freight and handling charges. Cost is calculated using the weighted average method. Net realizable value represents the estimated selling price less all estimated costs of completion and costs necessary to make the sale. vi) Other income. Other income is recognised on accrual basis when the Company's entitlement to the revenue is established.

vi) Current versus non-current classification

The Company presents assets and liabilities in the statement of financial position based on current/non-current classification.
An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle.
- Held primarily for the purpose of trading.
- Expected to be realised within twelve months after the reporting period. or,
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

- A liability is current when:
- It is expected to be settled in the normal operating cycle.
- It is held primarily for the purpose of trading.
- It is due to be settled within twelve months after the reporting period. or,

- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. The Company classifies all other liabilities as non-current.

vii) Short term leases

The Company has elected not to recognise right-of-use assets and lease liabilities for short-term leases of office premises that have a term of 12 months or less or for leases of low value assets. The Company recognises the lease payments associated with these leases as an expense on a straight line basis over the lease.

viii) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liabilityThe principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

ix) Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. It can also be a present obligation arising from past events that is not recognised because it is not probable that outflow of economic resources will be required, or the amount of obligation cannot be measured reliably.

Contingent liabilities are not recognised but disclosed in the notes to the accounts. When a change in the probability of an outflow occurs so that outflow is probable, it will then be recognised as provision.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

Contingent assets are not recognised but are disclosed in the notes to the accounts when an inflow of economic benefits is probable. When an inflow is virtually certain, an asset is recognised.

x) Value added tax (VAT)

Value added tax (VAT) is charged on supply of goods and services in the United Arab Emirates and recovered on purchases of goods and services locally purchased. Expenses and assets are recognised net of the amount of VAT except for when it is not recoverable. The net amount of VAT recoverable from or payable to taxation authority is included as part of current asset or current liability.

xi) Property, plant and equipment

Property, plant, and equipment are stated at cost of acquisition less accumulated depreciation and impairment losses, if any. The cost comprises the acquisition/installation price and any attributable cost of bringing the plant and equipment to its working condition for its intended use.

Subsequent expenditures related to an item of plant and equipment are added to its gross value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance.

The residual values, useful life, and methods of depreciation of plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Depreciation on property, plant and equipment is provided using the Straight Line Method basis so as to write off the original cost of the asset less its estimated residual value over the estimated useful life.

xii) Operating expenses

Operating expenses are recognised in profit or loss upon utilisation of the service or as incurred.

xiii) Employee benefits

Employee benefits are expenses as the related services is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation ca be estimated reliably.

xiv) Income Taxes

The income tax expense represents the sum of current and deferred income tax expense.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

A provision is recognised for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is based on the judgement of tax professionals within the parent Company supported by previous experience in respect of such activities and in certain cases based on specialist independent tax advice.

xiv) Income Taxes (Continued)

Current tax and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Deferred Tax

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, a deferred tax liability is not recognised if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the reporting date.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

xv) Financial instruments

IFRS 9 sets out requirements for recognizing and measuring financial assets, financial liabilities and certain contracts to buy or sell non-financial items. This standard replaces IAS 39 Financial instruments: Recognition and Measurement. The details of new material accounting policies are set out below.

a. Recognition and initial measurement

Trade receivables and debt securities are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A contract receivable without a significant financing component is initially measured at the transaction price.

b. Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortized cost; FVOCI - debt investment; FVOCI - equity investment; or FVTPL, Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL: (i) it is held within a business model whose objective is to hold assets to collect contractual cash flows; and (ii) its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL: (i) the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and (ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investmentby-investment basis.

All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets - Business model assessment

The Company makes as assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets; how the performance of the portfolio is evaluated and reported to the Company's management; the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed; how the managers of the business are compensated - e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for de-recognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets. Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets - Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs [(e.g. liquidity risk and administrative cost), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

Financial assets- Subsequent measurement and gains losses

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.
Financial assets at amortized cost	These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on de-recognition is recognized in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On DE recognition, gains and losses accumulated in OCl are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI are never reclassified to profit or loss.

The

Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

Derivatives Financial Instruments

All derivatives in scope of IFRS 9, including those linked to unquoted equity investments, are measured at fair value. Value changes are recognized in profit or loss unless the company has elected to apply hedge accounting by designating the derivative as a hedging instrument in an eligible hedging.

Financial liabilities - Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortized cost using the

effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on de-recognition is also recognized in profit or loss.

c. De-recognition

Financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognized in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

Financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On de-recognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

d. Off setting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

e. Impairment

Financial instruments and contract assets

The Company recognizes loss allowances for ECLs on financial assets measured at amortized cost, debt investments measured at FVCI, and contract assets. The Company measures loss allowances at an amount equal to lifetime ECLs, except for debt securities that are determined to have low credit risk at the reporting date; and other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial statement) has not increased significantly since initial recognition which are measured at 12-months ECLs. Loss allowances for trade receivables and contract assets are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information. The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 365 days past due.

The Company considers a financial asset to be in default when the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realizing security (if any is held); or the financial asset is more than 365 days past due. The Company considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of investment grade.
Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs
ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the company in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets
At each reporting date, the Company assesses whether financial assets carried at amortized cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data such as significant financial difficulty of the borrower or issuer; breach of contract such as default or being more than 365 days past due; the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise; it is probable that the borrower will enter bankruptcy or other financial reorganization; or the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position
Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of assets. For debt securities at FVOCI, the loss allowance is charged to profit or loss.

f. Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Company has a policy of writing off the gross carrying amount based on historical experience of recoveries of similar assets. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery, the Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

Financial assets not classified as at FVTPL were assessed at each reporting date to determine whether there was objective evidence of impairment. Objective evidence that financial assets were impaired included default or delinquency by a debtor; restructuring of an amount due to the Company on terms that the Company would not consider otherwise; indications that a debtor or issuer would enter bankruptcy; adverse changes in the payment status of borrowers or issuers; the disappearance of an active market for a security because of financial difficulties; or observable data indicating that there was a measurable decrease in the expected cash flows from a Company of financial assets.

The Company considers of impairment for these assets at both an individual asset and a collective level. All individually significant assets are individually assessed for impairment. Those found not to be impaired are then collectively assessed for any impairment that has been incurred but not yet individually identified. Collective assessment is carried out by grouping together assets with similar risk characteristics. In assessing collective impairment, the Company uses historical information on the timing of recoveries and the amount of loss incurred, and makes an adjustment if current economic and credit conditions are such that the actual losses are likely to be greater of lesser than suggested by historical trends.

An impairment loss is calculated as the difference between an asset's carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognized in the profit or loss and reflected in an allowance account. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, then the previously recognized impairment loss is reversed through the profit or loss.

17 CURRENT INCOME TAX AND DEFERRED TAX

With the introduction of corporate tax in the United Arab Emirates, the Company is subject to corporate income tax at 9% on the taxable profits. The major components of income tax expense in the consolidated statement of profit or loss are:

Income tax expense comprises of the following:

	2026	2025
Current income tax:	**AED**	AED
Current year	**111,654**	92,464
Current income tax expense	**111,654**	92,464

Reconciliation of effective tax rate

	2026	2025
	AED	AED
Accounting profit for the year before tax	**1,542,775**	1,402,382
At UAE statutory tax rate of 9% charged during the year	**138,850**	126,214
Adjustment in respect of standard deduction as per law*	**(33,750)**	(33,750)
WHT written off	**6,554**	-
At the effective current income tax rate of 11.42%	**111,654**	92,464

*As per the UAE CT law, maximum standard deduction is AED 375,000. The standard deduction applicable is AED 375,000 on which tax rate at 9% amounts to AED 33,750.

As at 31 March 2026, income tax provision amounts to AED 111,654/- (31 March 2025: 92,464).

For the purpose of determining income tax expense for the year, the accounting profit has been adjusted for tax purposes. Adjustments for tax purposes include items relating to both income and expense. The adjustments are based on the current understanding of the existing tax laws, regulations and practices. The Company has not identified any material risks or uncertainties in the structure from a corporate tax perspective and will continuously monitor further developments that could impact the tax profile of the Company.

18 COMPANY'S RISK MANAGEMENT POLICIES

The management conducts and operates the business in a prudent manner, taking into account the significant risks to which the business is or could be exposed.
The primary risks to which the business is exposed comprise credit, currency and liquidity and cash flow interest rate risks.

Credit risk

Financial assets that potentially expose the Company to concentrations of credit risk comprise principally bank balances and accounts and other receivables.
Credit risk relating to accounts receivable is managed by assessing the creditworthiness of potential customers and the potential for exposure to the market in which they operate, combined with regular monitoring and follow-up.

The Company's bank accounts are placed with high credit quality financial institutions.

Currency risk

There are no significant exchange rate risk as substantially all financial assets and liabilities are denominated in AED or US Dollars against which the UAE Dirham rate is fixed.

Fair value

The fair value of a financial instrument is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.
The fair value of the financial assets and financial liabilities which are required to be carried at cost or at amortized cost approximates to their carrying values.

Notes to the financial statements (continued)
For the year ended 31 March 2026

19 SUBSEQUENT EVENTS

There are no significant events since the end of the financial year and the date of this report, which is likely to effect, substantially the result of the operations or the financial position of the Company

20 Parent Company (Newgen Software Technologies Limited) has established Employees Stock Option Scheme (ESOP) in fiscal year 2014 and 2022, and Restricted Stock Units (RSU) Scheme in fiscal year 2021. The Company's employees participate in an equity-settled share-based payment scheme operated by the Parent company (Newgen Software Technologies Limited) under which eligible employees are granted options/awards over the equity shares of the parent. The Company does not have an obligation to settle the awards; settlement is made by the parent in its own equity instruments. In accordance with IFRS 102, the Company recognizes an expense for the services received from employees, measured at the grant-date fair value of the equity instruments granted, spread over the vesting period. The corresponding credit is recognized directly in equity as a capital contribution from the parent, reflecting the parent's settlement of the award on the Company's behalf.

During the year, the Company identified that, in prior accounting periods, it had not recognized an expense in respect of share-based payment awards granted by the parent company to employees of the Company. Under IFRS 102, such awards give rise to an expense in the financial statements of the entity that receives the employee's services, with a corresponding credit to equity representing a capital contribution from the parent. The cumulative expense relating to services received in periods up to and including the year ended 31 March 2026 amounts to AED 20,834. The directors have considered the requirements of IFRS 102 and, having regard to the size of the adjustment relative to the Company's results and net assets, consider the amount to be immaterial to the financial statements of prior periods, both individually and in aggregate.

Accordingly, the comparative figures have not been restated. The cumulative adjustment of AED 20,834 has been recognized in the current year through a transfer from retained earnings to the deemed capital contribution. This transfer has no effect on total equity, net assets, or the profit or loss for the current year. The charge recognized in the profit and loss account for the year ended 31st March 2026 is NIL.

21 COMPARATIVE FIGURES

Previous year's figures have been reclassified / re-established wherever necessary to conform to the presentation adopted in these financial statements. Figures of the Company have been rounded off to nearest AED 1/-

The accompanying notes from 1 to 21 form an integral part of these financial statements.
